Titanic EDA Dashboard

This dashboard presents the cleaned Titanic dataset stored in MongoDB and the generated visualizations.

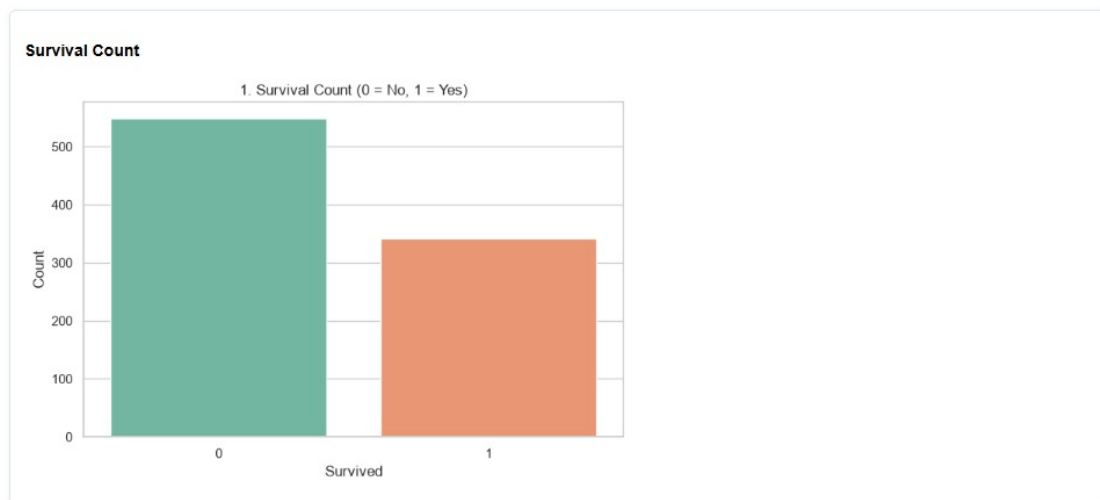

Run the EDA pipeline

Execute `python eda.py` first to load the Titanic data, clean it, save it into MongoDB, and generate the plots.

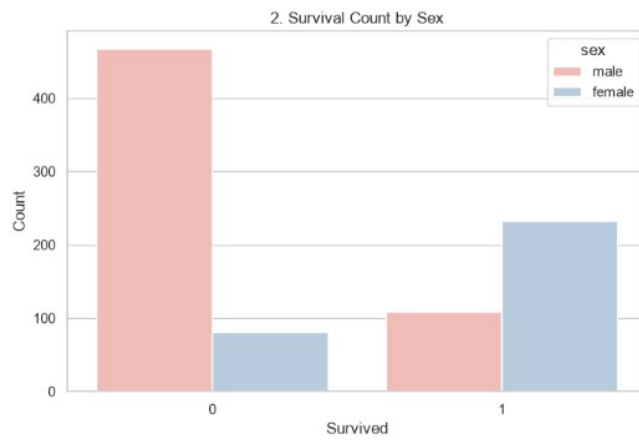

MongoDB connection

Using `mongodb://localhost:27017` with database `eda_db` and collection `titanic_cleaned`.

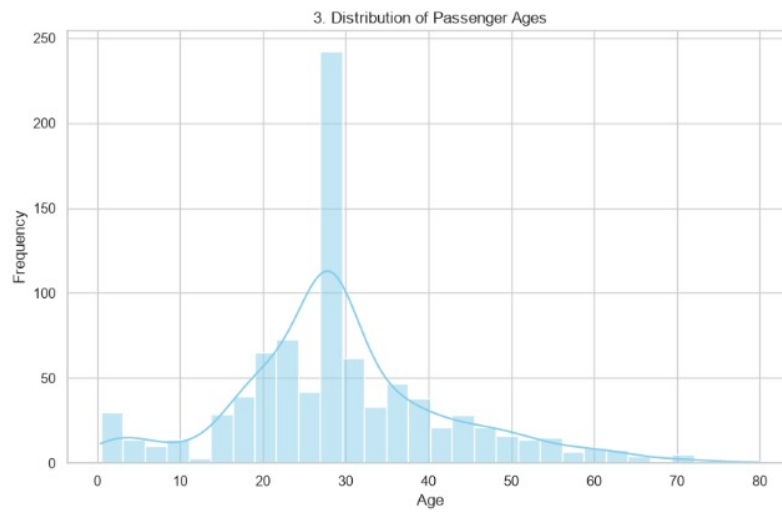

Available Visualizations

Survival Count by Sex

Distribution of Passenger Ages

Correlation Heatmap
